

## Glove Selection Chart and Information

### - Sizing Chart -

Use the chart below as a general guideline for determining glove size.

Age	Position	Glove Size
3-4	General	9 (youth model)
5-6	General	10 to 10 1/2 (youth model)
7-8	General	10 1/2 to 11 (youth model)
9-12	General	11 to 11 1/2 (youth model)
High School/Adult	Infield	11 to 11 1/2
High School/Adult	Outfield	12 to 12 1/2

### Breaking in your Glove

Most manufacturers agree that a glove oil or leather conditioner cream should be used as long as it does not contain silicon. Most manufacturers recommend not using anything that requires a microwave or an oven. Apply a small amount of Glove Oil in the triangular area shown. Rub it into the leather until most of it has been absorbed, then wipe off the excess with a soft towel. Next, fold the glove at the hinge and exercise that area a bit. Then, fold the glove and squeeze the fold so that

a crease can be formed along the triangle line from the index finger side to the hinge. After setting this crease, re-fold the glove and form a similar crease from the thumb side of the triangle to the hinge. The final step is to re-fold the glove so a crease can be formed from the center of the web crotch to the hinge. When finished with these steps you should be able to see three distinct creases fanning out from the hinge to the web crotch. After completing these steps (about 20 minutes) put the glove on your hand and close it a few times. You should be able to feel a difference in the way the glove responds. Repeat

this procedure in a few days, but do not use the glove oil in excess.
