

**RFP #2023-01**

**WATER AND WASTEWATER TREATMENT CHEMICALS**

**\*\*Addendum #2\*\***

**Statement Regarding Liquid Chlorine Delivery Options**

The City of Wildwood currently has separate vendors for liquid chlorine for water and wastewater uses. Water plants have smaller tanks than wastewater plants. Proposals that only deliver large or small quantities may be considered, but the bid proposal should clarify any delivery stipulations by checking the exceptions/deviations statement on the Proposals Form and attaching a sheet with the proposer's delivery stipulations. The City of Wildwood will show preference to one supplier for both water and wastewater liquid chlorine but will review and consider all proposals and choose the supplier(s) that provide the most benefit to the City.
